Memorandum

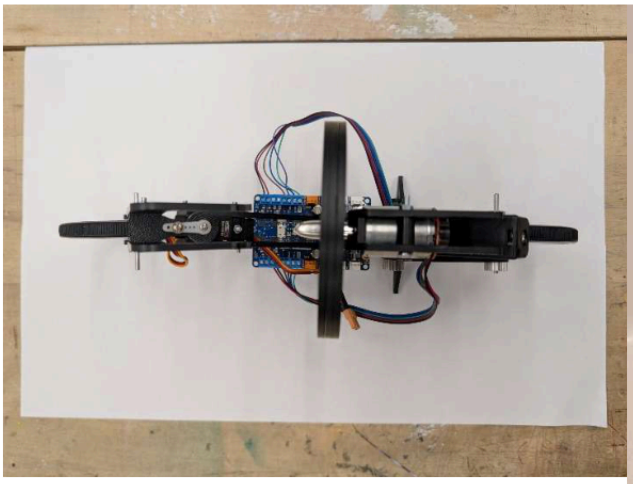

MA4: Motorcycle Build

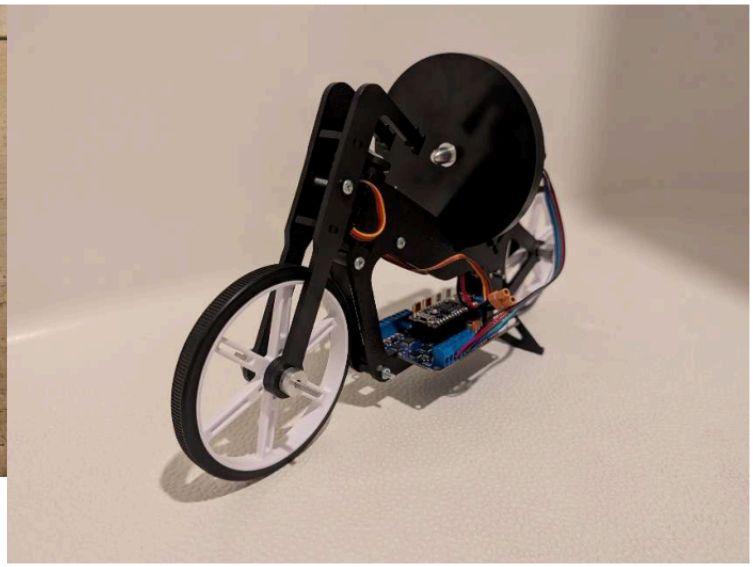

to: course staff

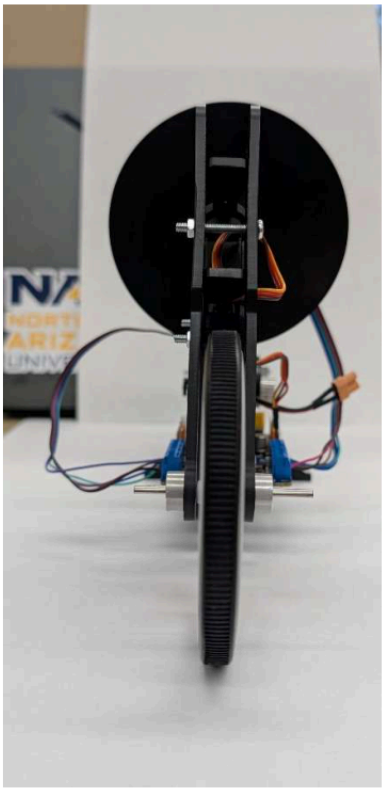

from: project team

context: undergraduate engineering project

Re: MA4: Motorcycle Build

2a) ***Who is on your team?***

the project was completed by a two-person team. responsibilities included controller software, technical communication, mechanical problem solving, and project coordination. both team members collaborated on the build and testing.

2b) ***The goal statement***

Our team's goal is to collaboratively create the longest-standing self-balancing motorcycle, using a mix of material learned from lecture, and unique programming methods to think outside the box, and have fun while fulfilling a lofty goal.

2c) ***The project plan***

- Actions we can take to reach our goals
  a. maintain the project plan and code repository.
  b. evaluate mechanical improvements beyond the initial build.
  c. Check in regularly with faculty (Both
- Communication and file sharing
  - Communication will happen mainly over Discord, with Github serving as the main home for our code. Discord can also be used to share one-off files but is worse for collaborating on code.
- When will we start assignments?
  - Assignments will be at least coordinated starting no later than the Monday of the due date's week.
- Where will we meet to work on assignments?
  work sessions used university study and fabrication spaces, with access to tools as needed.
